Judicial precedents/Case law

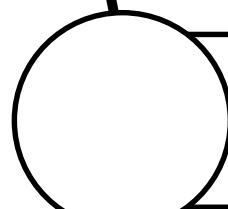

- A precedent is defined as a decision in a previous legal case where the facts were similar to the case before the court.
- It is a judgement of a court, normally recorded in law reports, used as an authority for reaching the same decision in subsequent cases.
- It is the legal principle which the judge relied on in determining the outcome of a case

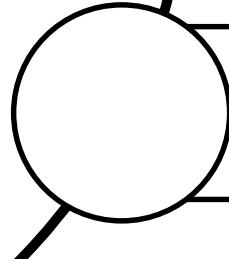

Words used

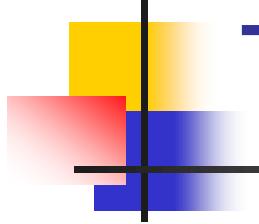

Stare decis

Ratio decidendi

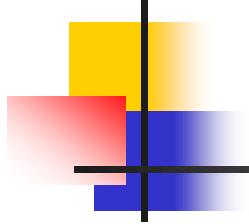

Orbita dicta

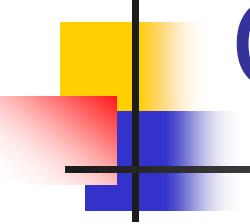

Types of precedents

- Binding precedent
- Persuasive precedents
- Future precedents
- Declaratory precedents
- Distinguishing precedent
- Overruling precedent

Distinguishing

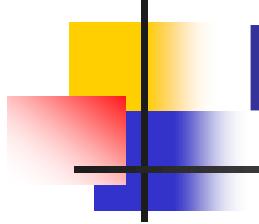

- The judge finds that facts of the case he is deciding are sufficiently different to draw a distinction between the present case and the previous precedent; not bound by the previous case

Overrule

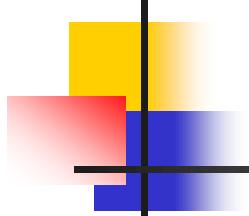

To annul, to make void. This word is frequently used to signify that a case has been decided directly opposite to a former case; when this takes place, the first decided case is said to be overruled as a precedent, and cannot any longer be considered as of binding authority

To decide (by a court of appeals) that a prior decision on a legal issue was not correct, and is therefore no longer a valid precedent on that legal question

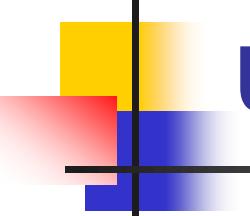

Reversing

- A court higher up in the hierarchy overturns the decision of a lower court on appeal in the same case
- The Court of Appeal may disagree with the legal ruling of the High Court; in this situation they reverse the decision of the High Court

Examples of persuasive precedents

- **decisions made in lower courts or courts of equal standing;**
- **decisions of courts outside the Kenyan judicial system;**
- **obiter dicta; and**
- **textbooks, learned treaties and the law of other jurisdictions.**

When a precedent may not be used

- If the facts are not similar or the two cases are not similar
- If it has been overruled
- If the judge has been able to distinguish
- If it is in the lower courts
- If the judgment was obtained through fraud

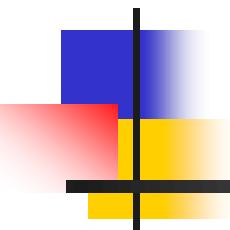

Advantages and disadvantages of judicial precedents

Advantages

- **Certainty**
- **Possibility of growth**
- **Rich in detail**
- **Flexibility**
- **Consistency & fairness**
- **Time saving**

Disadvantages
